### Guidance Information

1 Scope of practice  
 Working *under supervision* means the ability to work to construction workplace standards under the supervision of a commercially competent practitioner whose role is to ensure the completed construction meets industry and regulatory requirements. This standard does not recognise commercial competence.

2 Assessment  
 This unit standard must be assessed under the supervision of a commercially competent practitioner in construction workplace conditions that reflect:

- current health, safety, industry, and workplace requirements; and
- industry requirements for commercially acceptable timeframes.

Evidence generated for assessment against this standard must be verified by a person who has current expertise in the building and construction trades and has had the opportunity to regularly observe the candidate in the workplace.

3 Range  
 Evidence generated for assessment against this standard must meet workplace and industry requirements specified in:

- documented worksite specifications, procedures, and practices;
- manufacturer recommendations, specifications, and technical data sheets;
- applicable specifications from other sources such as an architect, designer, engineer, or supervisor;
- applicable material safety data sheets;
- NZS 3604:2011 *Timber Framed Buildings*;
- the New Zealand Building Code;
- consents, working drawings, plans and specifications, reports, producer statements, relevant industry standards, other documentation critical to the construction process.

Evidence generated for assessment against this standard must reflect the requirements of:

- Building Act 2004;
- Health and Safety at Work Act 2015;
- Resource Management Act 1991;
- Building Regulations 1992;
- Building (Forms) Regulations 2004;
- Health and Safety in Employment Regulations 1995.

## Outcomes and performance criteria

### Outcome 1

Cut, fit, and fix interior linings and trim under supervision.

Range interior linings include two of – pre-finished board, plywood, medium-density fibre board, fibre cement;  
plasterboard linings include two of – standard, water resistant, fire resistant, impact resistant, bracing, sound control;  
interior trim includes two of – architrave, cornice, skirting, corner and joint mouldings, dado, scotia.

### Performance criteria

1.1 Undertake pre-installation verification checks.

Range wall and ceiling framing members fixed; insulation installed according to specification and site documentation; pipes, wires, and other in-built services and fixtures installed in the wall cavities; required systems tests completed; confirmation of Building Consent Authority pre-line inspection.

1.2 Receive and store materials.

Range materials include – interior linings, interior trim, plasterboard linings;  
consignment details checked, stored without damage.

1.3 Cut, fit, and fix interior linings for a construction job.

1.4 Cut, fit, and fix plasterboard linings for a construction job.

1.5 Cut, fit, and fix interior trim for a construction job.

**Outcome 2**

Clean and store tools, plant, and equipment used to install interior linings and trim.

Range plant includes – any machinery, vehicle, vessel, aircraft, equipment (including personal protective equipment), appliance, container, implement, or tool; any component of any of those things; anything fitted or connected to any of those things;  
personal protective equipment includes – anything used or worn by a person (including clothing) to minimise risks to the person's health and safety;  
air-supplied respiratory equipment.

**Performance criteria**

2.1 Clean workplace, tools, and plant used to install interior linings and trim.

2.2 Store tools and plant used to install interior linings and trim.

<b>Replacement information</b>	This unit standard replaced unit standard 13058.
