

Title	Construct pole framing to form the foundation for a residential dwelling under supervision		
Level	3	Credits	10

Purpose	People credited with this standard can: <ul style="list-style-type: none"> • construct pole framing to form the foundation for a residential dwelling under supervision; and • clean and store tools, plant and equipment used to construct pole framing.
----------------	---

Classification	Construction Trades > Carpentry
-----------------------	---------------------------------

Available grade	Achieved
------------------------	----------

Guidance Information

- 1 Scope of practice
Working under supervision means the ability to work to construction workplace standards under the supervision of a commercially competent practitioner whose role is to ensure the completed construction meets industry and regulatory requirements. This standard does not recognise commercial competence.

- 2 Assessment
 This unit standard must be assessed under the supervision of a commercially competent practitioner in construction workplace conditions that reflect:
- current health, safety, industry, and workplace requirements; and
 - industry requirements for commercially acceptable timeframes.

Evidence generated for assessment against this standard must be verified by a person who has current expertise in the building and construction trades and has had the opportunity to regularly observe the candidate in the workplace.

- 3 Range
 Pole framing includes a pole platform and may include a pole frame to support a roof structure.

Evidence generated for assessment against this standard must reflect workplace and industry requirements specified in:

- documented worksite specifications, procedures, and practices;
- manufacturer recommendations, specifications, and technical data sheets;
- applicable specifications from other sources such as an architect, designer, engineer, or supervisor;
- applicable material safety data sheets;
- NZS 3604:2011 *Timber Framed Buildings*;
- the New Zealand Building Code.

Evidence generated for assessment against this standard must reflect the requirements of:

- Building Act 2004;
- Health and Safety at Work Act 2015;
- Resource Management Act 1991;
- Building Regulations 1992;
- Building (Forms) Regulations 2004;
- Health and Safety in Employment Regulations 1995.

NZS 3604:2011 *Timber Framed Buildings*. Available from Standards NZ (<http://www.standards.co.nz>).

Outcomes and performance criteria

Outcome 1

Construct pole framing to form the foundation for a residential dwelling under supervision.

Performance criteria

1.1 Set out pole positions to meet the specifications in site documentation.

Range line, plumb, depth.

1.2 Excavate holes for the placement of poles.

1.3 Erect pole framing to meet the specifications in the site documentation.

Range mechanical fixings and protective finishes, attachment of bearers and temporary and permanent braces, re-treatment of cuts, weatherproofing of poles.

Outcome 2

Clean and store tools, plant, and equipment used to construct pole framing.

Range plant includes – any machinery, vehicle, vessel, aircraft, equipment (including personal protective equipment), appliance, container, implement, or tool; any component of any of those things; anything fitted or connected to any of those things;
personal protective equipment includes – anything used or worn by a person (including clothing) to minimise risks to the person's health and safety;
air-supplied respiratory equipment.

Performance criteria

2.1 Clean workplace, tools, and plant used to construct pole framing.

2.2 Store tools and plant used to construct pole framing.

Replacement information	This unit standard replaced unit standard 13060.
