### Guidance Information

#### 1 Assessment

This unit standard is intended to align with the *New Zealand Certificate in Flooring Planning & Design – Specifications* and the New Zealand Certificate in Flooring Planning and Design (Level 4) [Ref: 4297].

Evidence for this standard must reflect commercial competence.

Commercial competence refers to the ability to demonstrate knowledge and skills in the context of the currently accepted requirements of a business operating in a commercial environment.

Commercial competence must be confirmed by a person with current expertise in the flooring planning and design trade.

#### 2 Definitions

*Purpose of space* is how the area is used.

*Workplace procedures* refers to the documented procedures specific to a workplace which sets out the standard and the required practices of that workplace.

#### 3 Legislation, standards and guidance information relevant to this standard includes the following; and any subsequent amendments and replacements:

*New Zealand Certificate in Flooring Planning & Design – Specifications*, BCITO, September 2020, available from [www.waihanga.nz](http://www.waihanga.nz).

## Skill specification and performance level guidance

### Skill specification

Evaluate project information to provide design solutions for flooring operations.

### Knowledge

How to select and interpret current information about flooring products and design trends.

The impact that principles of colour and design trends have on flooring solutions.

Range may include – regional styles, themes, integration with associated décor, functionality of flooring.

The purpose of, and methods to make comparisons between different flooring and design solutions.

How different factors influence the selection and installation of floor coverings.

Range different factors include – aesthetics, durability of product, purpose of space, environmental conditions flooring will be exposed to, construction techniques, product supply, regulatory requirements, project budget;  
environmental conditions include – exposure to sun, level of humidity.

## Skills

Provide informed and relevant advice to clients on flooring products and design trends.

Range may include – product selection, installation processes, overall design;  
advice may include – verbal, written.

Provide informed and relevant advice on the ongoing care and maintenance of flooring, and how to remedy common issues.

Range common issues may include – product failure, inappropriate product installation, and incorrect maintenance;  
advice may include – verbal, written, electronic.

Evaluate information and prepare flooring product and design solutions for clients.

Range may include – design trends, factors that influence floor covering selection, purpose of space, impact of installation methods, environmental conditions, associated outcomes of different flooring options.

## Performance level guidance

Performance must reflect industry best practice guidance, legislative requirements, and workplace procedures.

Performance must reflect consideration for the purpose of the space; it may include living spaces, wet areas, spaces that are used for wheelchairs, and heavy-duty areas.

<b>Replacement information</b>	This unit standard was replaced by skill standard 40282.
