Guidance Information

1 Assessment

This unit standard is intended to align with the *New Zealand Certificate in Concrete Construction Skills Specifications* and the *New Zealand Certificate in Concrete Construction Skills (Level 3)* [Ref: 4189].

Evidence for this standard must reflect commercial standards.

Commercial standards refer to verbal and written information covering company policy, standard operating procedures and processes, and job-specific instructions.

Working to commercial standards refers to the ability to consistently:

- perform standard processes to current industry standards, on demand and within a commercially acceptable timeframe;
- perform non-standard processes to current industry standards, on demand and within a commercially acceptable timeframe, under the supervision of a commercially competent practitioner.

Working to commercial standards must be confirmed by a person with current expertise in concrete product manufacture.

2 Definition

Concrete product manufacture refers to the manufacture of concrete products using automated or semi-automated standardised production processes.

- 3 Legislation, standards and guidance information relevant to this standard includes the following; and any subsequent amendments and replacements.

Skill specification and performance level guidance

Skill specification

Demonstrate knowledge of concrete used for the manufacture of concrete products.

Knowledge

The main ingredients, composition and physical characteristics of fresh and hardened concrete.

Range ingredients include – cement, aggregate, water and additives that modify the appearance and workability of concrete;
physical characteristics include – colour, presence of additives, aggregate size and type and water content.

The processes for testing concrete for concrete product manufacture.

Range may include – testing fresh concrete and hardened concrete.

Performance level guidance

Performance must reflect current regulatory, industry and commercial standards relevant to concrete product manufacture.

Testing processes include visual checks, tests on fresh and hardened concrete, and quality control procedures expected in a commercial concrete product-manufacturing environment.

Planned review date	31 December 2026
