

Title	Diagnose complex faults in vehicle or machine driveline systems and reflect on diagnostic procedures		
Level	5	Credits	10

Purpose	People credited with this unit standard are able to: explain driveline system operation to enable complex fault diagnosis; diagnose the cause of complex driveline system faults; and reflect on learning experience in response to diagnosing complex driveline system faults.
----------------	---

Classification	Motor Industry > Automotive Transmission Systems
-----------------------	--

Available grade	Achieved
------------------------	----------

Guidance Information

- 1 Evidence presented for assessment against this unit standard must be consistent with safe working practices and be in accordance with applicable service information, and company and legislative requirements. This includes the knowledge and use of suitable tools and equipment.
- 2 Legislation, regulations and industry standards relevant to this unit standard include but are not limited to the:
Health and Safety at Work Act 2015.

Any new, amended or replacement Acts, regulations, standards, codes of practice, guidelines, or authority requirements or conditions affecting this unit standard will take precedence for assessment purposes, pending review of this unit standard.

- 3 Definitions
Company requirements refer to instructions to staff on policy and procedures that are available in the workplace. These requirements may include – company policies and procedures, work instructions, product quality specifications and legislative requirements.
Service information refers to technical information for a vehicle, machine, or product detailing operation; installation and servicing procedures; manufacturer instructions; technical terms and descriptions; and detailed illustrations.

4 Range

Complex faults may include faults within multiple systems, intermittent faults, faults caused indirectly by the effect of external systems or caused through system repairs. *Driveline systems* may include – electronic or mechanical; transmission, final drive. *Fault diagnosis* would require applying a complex investigative diagnostic process to rectify them.

Learning experience involves a reflection on the overall process to form a holistic viewpoint. This may refer to one or more learning experiences.

- 5 It is recommended that people hold credit for Unit 31050, *Diagnose and repair automotive driveline system faults*, before being assessed against this unit standard.

Outcomes and performance criteria

Outcome 1

Explain driveline system operation to enable complex fault diagnosis.

Performance criteria

- 1.1 Comprehensive operation of the driveline system to enable system fault diagnosis is explained.

Range interaction between mechanical and electronic components.

Outcome 2

Diagnose the cause of complex driveline system faults.

Range evidence of at least one fault in two different systems, each on a different vehicle is required.

Performance criteria

- 2.1 Complex driveline system fault is analysed.

Range operator description, diagnostic testing.

- 2.2 Cause of complex driveline system fault is determined.

Outcome 3

Reflect on learning experience in response to diagnosing complex driveline system faults.

Performance criteria

- 3.1 Experience of diagnosing complex driveline system faults is reflected on and described in relation to the knowledge and analytical skills acquired.

- 3.2 Improvements to future diagnostic procedures are identified based on own reflection.

Planned review date	31 December 2027
----------------------------	------------------

Status information and last date for assessment for superseded versions

Process	Version	Date	Last Date for Assessment
Registration	1	26 January 2023	N/A

Consent and Moderation Requirements (CMR) reference	0014
