- 2 Assessment

Evidence for this unit standard must reflect commercial competence; the ability to demonstrate knowledge and skills in the context of the currently accepted requirements of a business operating in a commercial environment.

Evidence must also reflect commercial standards; the verbal and written information covering company policy, standard operating procedures and processes and job-specific instructions.

This unit standard must be assessed under the supervision of a commercially competent practitioner in workplace conditions that reflect:

- commercial standards, current health, safety, industry, and workplace requirements; and
- industry requirements for commercially acceptable timeframes.

3 Definitions

Kitchen joinery work refers to cabinetry that is fixed and may include bathroom, laundry, storage solutions, or wardrobe components.

Properties refer to those which require environmental consideration as well as compatibility with other materials and products.

Workplace requirements refer to the documented procedures specific to a workplace that which sets set out the standard and the required practices of that workplace.

This may include job specifications, procedures, practices, manufacturer recommendations, technical data sheets, material safety data sheets.

Outcomes and performance criteria

Outcome 1

Describe materials and products used for kitchen joinery work.

Performance criteria

- 1.1 Types of materials used in the manufacture and installation of kitchens are described in terms of their properties and use.

Range materials include – timber, composite materials, laminates, veneers, and acrylics;
evidence of two from each type of material is required.

- 1.2 Types of hardware used in the manufacture and installation of kitchens are described in terms of their properties and use.

Range hardware includes – handles, hinges, slides, adjustable plinth legs, catches, roller doors, rails, cutlery inserts, kitchen bins.

- 1.3 Types of fixings used in the manufacture and installation of kitchens are described in terms of their use.

Range fixings include – screws, cams, biscuits, dowels, brads.

- 1.4 Types of adhesives and sealants used in the manufacture and installation of kitchens are described in terms of their properties and use.

Range two adhesives and two sealants.

- 1.5 Types of benchtop inserts used in the manufacture and installation of kitchens are described in terms of their use.

Range inserts include – bowls, sinks, drainers.

1.6 Kitchen appliances are described in terms of installation requirements.

Range ventilation, clearance, position, shielding;
evidence of three appliance types is required.

Outcome 2

Receive, handle, and store, materials and products used for kitchen joinery work.

Performance criteria

2.1 Materials and products for kitchen joinery work are received, handled, and stored.

Range materials, adhesives and sealants, hardware, mechanical fixings, inserts, appliances, electrical and plumbing items.
