## 2 Definitions

*Hot water supply systems* refer to low pressure systems, which include open vented, valve vented, controlled and uncontrolled heat sources, and push through systems; and mains pressure systems.

*Job specifications* refer to instructions (oral, written, graphic) and may include any of the following: manufacturer instructions; design drawing detail specifications; specifications from a specialist source such as an architect, designer, engineer, or a supervisor; and site or work specific requirements.

## 3 Candidates must hold a current limited certificate trainee authorisation or exemption under supervision as issued under the Plumbers, Gasfitters, and Drainlayers Act 2006.

## 4 Assessment information

All work must be completed in accordance with job specifications and relevant standards and codes.

## 5 Range

Evidence is required for two new mains pressure hot water supply systems. One of these installations must be a storage water heating system. This does not include like-for-like replacements.

## 6 Level of performance

To achieve this standard the candidate must be capable of consistently performing the requirements:

- to current and relevant legislation, standards and codes (including safety);
- in an environmentally sustainable manner;
- within an acceptable timeframe;
- in the workplace;
- in different and unfamiliar contexts.
