

<b>Title</b>	<b>Repair or overhaul aircraft gas turbine engine fuel control units</b>		
<b>Level</b>	<b>4</b>	<b>Credits</b>	<b>12</b>

<b>Purpose</b>	People credited with this unit standard are able to: prepare to repair or overhaul aircraft gas turbine engine fuel control units; locate defects in aircraft gas turbine engine fuel control units; repair or overhaul aircraft gas turbine engine fuel control unit components; test and adjust aircraft gas turbine engine fuel control unit components; and complete the repair or overhaul tasks for aircraft gas turbine engine fuel control units.
----------------	---

<b>Classification</b>	Aeronautical Engineering > Aircraft Powerplant Repair and Overhaul
-----------------------	--

<b>Available grade</b>	Achieved
------------------------	----------

---

### Guidance Information

- 1 All tasks must be carried out in accordance with enterprise procedures.
- 2 Definitions  
*Enterprise procedures* – procedures used by the organisation carrying out the work and applicable to the tasks being carried out. Examples are – standard operating procedures, safety procedures, equipment operating procedures, codes of practice, quality management practices and standards, procedures to comply with legislative and local body requirements.  
*Fuel control units* are attached to an aircraft gas turbine engine.
- 3 Repair or overhaul activities are those usually carried out in a specialist bay or workshop.
- 4 Credit for this unit standard may also be gained from tasks assessed on aero-derivative engines, and associated systems and components used for marine or industrial applications.

---

### Outcomes and performance criteria

#### Outcome 1

Prepare to repair or overhaul aircraft gas turbine engine fuel control units.

#### Performance criteria

- 1.1 Task is determined by reviewing maintenance documentation and enterprise procedures.

- 1.2 Component identity is confirmed with documentation.
- 1.3 Work area is prepared, and resources are obtained and checked.
- Range may include but is not limited to – publications, materials, tools, equipment, safety equipment, environmental conditions established.
- 1.4 Component is prepared for repair or overhaul.
- Range may include but is not limited to – clean, inspect.
- 1.5 Next task is determined and documented.
- Range may include but is not limited to – locate defects, repair, overhaul, test, adjust, complete the task.

## Outcome 2

Locate defects in aircraft gas turbine engine fuel control units.

### Performance criteria

- 2.1 Defects are located using troubleshooting techniques appropriate to the defect indications.
- 2.2 Defects found during troubleshooting are reported and documented.

## Outcome 3

Repair or overhaul aircraft gas turbine engine fuel control unit components.

### Performance criteria

- 3.1 Component is disassembled.
- Range may include but is not limited to – clean, label, preserve.
- 3.2 Defects found during disassembly are reported and documented.
- 3.3 Rectification action is determined and documented.
- 3.4 Replacement parts are procured and verified as authentic and serviceable.
- Range identify, inspect.
- 3.5 Defects are rectified.
- Range may include but is not limited to – repair, replace, modify, adjust.
- 3.6 Component is assembled.

3.7 Inspections are obtained.

#### Outcome 4

Test and adjust aircraft gas turbine engine fuel control unit components.

##### Performance criteria

4.1 Component is prepared for testing.

4.2 Component is tested and adjusted.

Range may include but is not limited to – troubleshoot, functionally test, calibrate, adjust, document adjustments and performance.

4.3 Inspections are obtained.

#### Outcome 5

Complete the repair or overhaul task for aircraft gas turbine engine fuel control units.

##### Performance criteria

5.1 Component is prepared for use, storage, or transit.

Range may include but is not limited to – locking, inhibiting, blanking, packing.

5.2 Resources are checked for serviceability and returned to service or storage.

Range may include but is not limited to – tools, equipment, safety equipment, publications.

5.3 Leftover parts and materials are disposed of.

Range may include but is not limited to – serviceable, unserviceable, surplus, waste, scrap, hazardous.

5.4 Documentation is completed.

5.5 Work area is left in a state that enables the next task to begin.
