

<b>Title</b>	<b>Disperse softened coloured material in repulped waste for paper making</b>		
<b>Level</b>	<b>4</b>	<b>Credits</b>	<b>10</b>

<b>Purpose</b>	People credited with this unit standard are able to: explain fundamentals of pulp dispersing systems; operate and maintain a dispersing unit efficiently; and monitor and control the efficient performance of a dispersing unit.
----------------	---

<b>Classification</b>	Wood Fibre Manufacturing > Paper Making
-----------------------	---

<b>Available grade</b>	Achieved

### Explanatory notes

#### 1 Definition

*Worksite documentation* refers to instructions to staff on policy and procedures (including the application of legislation to worksite situations) which are formally documented, and are available for reference at the worksite. Examples are standard operating procedures, specifications, manuals, and manufacturer's information.

#### 2 The following apply to the performance of all outcomes of this unit standard:

- a All work practices must meet recognised codes of practice and documented worksite health and safety and environmental procedures (where these exceed code) for personal, product, and worksite health and safety, and must meet the obligations required under current legislation, including the Health and Safety in Employment Act 1992, the Resource Management Act 1991, the Hazardous Substances and New Organisms Act 1996, and their subsequent amendments.
- b All work practices must meet documented worksite operating procedures. This includes the recording (by electronic or non-electronic means) of activities, events, and decisions.
- c All communications made in relation to this unit standard must be made in accordance with worksite procedures for content, recipient, timing, and method.

---

### Outcomes and evidence requirements

#### Outcome 1

Explain fundamentals of pulp dispersing systems.

#### Evidence requirements

- 1.1 Purpose of dispersing pulp is explained in terms of uniformity of end product, and the removal of previous processing materials.

- 1.2 Dispersing variances are identified and explained in accordance with worksite documentation.
- Range may include but is not limited to – consistency, temperature, worn internal components.
- 1.3 Operating components and process controls of dispersing units are identified, and their purpose is explained, in accordance with worksite documentation.
- Range stator and rotor plates.
- 1.4 Hazards associated with operating dispersing units are identified and actions to be taken to isolate, minimise, or eliminate the hazard are described in accordance with worksite documentation.
- Range hazards may include but are not limited to – moving parts, electricity, water.
- 1.5 Consequences of non-conformance with worksite operating procedures are described in accordance with worksite documentation.
- 1.6 Roles and responsibilities of the pulp dispersing systems operator are described in accordance with worksite documentation.

## Outcome 2

Operate and maintain a dispersing unit efficiently.

### Evidence requirements

- 2.1 Safe work practices associated with operating a dispersing unit are demonstrated in accordance with worksite documentation and legislative requirements.
- Range practices may include but are not limited to – isolation procedures, lock-outs, emergency stops, machine guarding, wearing appropriate safety equipment.
- 2.2 Dispersing unit is set up, started up, operated, and shut down efficiently in accordance with worksite documentation.
- 2.3 Setting and timely adjustment of operating parameters enables production requirements to be achieved in accordance with worksite documentation.
- Range operating parameters – energy input, consistency, throughput.
- 2.4 Preventative maintenance and cleaning requirements are carried out in accordance with worksite documentation.

## Outcome 3

Monitor and control the efficient performance of a dispersing unit.

**Evidence requirements**

3.1 Monitoring and interpretation of feedback information and the timely adjustment of control parameters enable product quality, efficient plant performance, and process and legislative requirements to be maintained in accordance with worksite documentation.

Range control parameters – energy input, consistency, throughput.

3.2 Operating and equipment faults and malfunctions are identified, and corrective action is taken, in accordance with worksite documentation.

Range operating faults and malfunctions – abnormal noise, high and low drive motor loads, internal component wear, leaks;  
equipment faults and malfunctions – electrical, mechanical, hydraulic, pneumatic, instrumentation.

3.3 Output product meets the requirements of worksite documentation for volume, colouration, and consistency.

3.4 Production rate is regulated in accordance with worksite documentation and process requirements.

3.5 Production, maintenance, and quality records are explained and completed in accordance with worksite documentation.

<b>Planned review date</b>	31 December 2019

<b>Consent and Moderation Requirements (CMR) reference</b>	0173
--	------

This CMR can be accessed at <http://www.nzqa.govt.nz/framework/search/index.do>.

**Please note**

Providers must be granted consent to assess against standards (accredited) by NZQA, before they can report credits from assessment against unit standards or deliver courses of study leading to that assessment.

Industry Training Organisations must be granted consent to assess against standards by NZQA before they can register credits from assessment against unit standards.

Providers and Industry Training Organisations, which have been granted consent and which are assessing against unit standards must engage with the moderation system that applies to those standards.

Requirements for consent to assess and an outline of the moderation system that applies to this standard are outlined in the Consent and Moderation Requirements (CMR). The CMR also includes useful information about special requirements for organisations wishing to develop education and training programmes, such as minimum qualifications for tutors and assessors, and special resource requirements.
