|--------------|---|----------------|-----------|
| Title | Repair aircraft cockpit voice recorders and area microphone components | | |
| Level | 4 | Credits | 30 |

| | |
|----------------|---|
| Purpose | People credited with this unit standard are able to: prepare to repair aircraft cockpit voice recorders and area microphone components; locate defects in aircraft cockpit voice recorders and area microphone components; repair aircraft voice recorders and area microphone components; test and adjust aircraft voice recorders and area microphone components; and complete the repair task. |
|----------------|---|

| | |
|-----------------------|---|
| Classification | Aeronautical Engineering > Avionic Radio Repair |
|-----------------------|---|

| | |
|------------------------|----------|
| Available grade | Achieved |
|------------------------|----------|

Guidance Information

- 1 All tasks must be carried out in accordance with enterprise procedures.
- 2 **Definition**
Enterprise procedures – procedures used by the organisation carrying out the work and applicable to the tasks being carried out. Examples are – standard operating procedures, safety procedures, equipment operating procedures, codes of practice, quality management practices and standards, procedures to comply with legislative and local body requirements.
- 3 The repair activities referred to in this unit standard are those usually carried out in a specialist bay or workshop on components that have been removed from the aircraft.

Outcomes and performance criteria

Outcome 1

Prepare to repair aircraft cockpit voice recorders and area microphone components.

Performance criteria

- 1.1 Task is determined by reviewing maintenance documentation and enterprise procedures.
 Range confirm fault, repair, modify.

1.2 Work area is prepared, and resources obtained and checked for serviceability or status.

Range may include but is not limited to – publications, materials, tools, equipment, safety equipment, environmental conditions established.

1.3 Component identity is matched with documentation.

1.4 Component is prepared for repair.

Range clean, inspect, assess economics of carrying out repair.

1.5 Next task is determined and documented.

Range locate defects, repair, test, adjust, complete the task.

Outcome 2

Locate defects in aircraft cockpit voice recorders and area microphone components.

Performance criteria

2.1 Defects are located using troubleshooting techniques and inspection procedures appropriate to the defect indications.

2.2 Any defects are reported and documented.

Outcome 3

Repair aircraft cockpit voice recorders and area microphone components.

Performance criteria

3.1 Component is disassembled.

Range clean, label, preserve, segregate, store.

3.2 Rectification action is determined and documented.

3.3 Parts are procured and verified as authentic and serviceable.

Range identify, inspect.

3.4 Defects are rectified.

Range repair, replace, modify, adjust.

3.5 Component is assembled.

3.6 Inspections are obtained.

Range independent, progressive.

Outcome 4

Test and adjust aircraft cockpit voice recorders and area microphone components.

Performance criteria

4.1 Component is prepared for testing.

4.2 Component is tested and adjusted.

Range may include but is not limited to – troubleshoot, functionally test, calibrate, adjust, document adjustments and performance.

4.3 Inspections are obtained.

Range independent, progressive.

Outcome 5

Complete the repair task.

Performance criteria

5.1 Component is prepared.

Range may include but is not limited to – use, storage, transit, locking, blanking, packing, shelf-life requirement.

5.2 Resources are checked for serviceability and returned to service or storage.

Range may include but is not limited to – tools, equipment, safety equipment, publications.

5.3 Leftover parts and materials are disposed of.

Range may include but is not limited to – serviceable, unserviceable, surplus, waste, scrap, hazardous.

5.4 Documentation is completed.

Range may include but is not limited to – labels, work cards, release notes.

5.5 Work area is left in a state that enables the next task to begin.
