

Title	Repair aeronautical component parts by flame spraying		
Level	4	Credits	15

Purpose	People credited with this unit standard are able to: prepare to flame spray aeronautical components; set up flame spraying equipment; flame spray aeronautical components; prepare aeronautical components; and carry out task completion activities.
----------------	---

Classification	Aeronautical Engineering > Aeronautical Machining
-----------------------	---

Available grade	Achieved
------------------------	----------

Guidance Information

- 1 All tasks must be carried out in accordance with enterprise procedures.
- 2 Definition
Enterprise procedures – procedures used by the organisation carrying out the work and applicable to the tasks being carried out. Examples are – standard operating procedures, safety procedures, equipment operating procedures, codes of practice, quality management practices and standards, procedures to comply with legislative and local body requirements.

Outcomes and performance criteria

Outcome 1

Prepare to flame spray aeronautical components.

Performance criteria

- 1.1 Component identity is confirmed with documentation by comparing serial and part numbers.
- 1.2 Task is established and documented.
- 1.3 Work area is prepared, and resources are obtained.

Range may include but is not limited to – publications, materials, tooling, equipment, safety equipment, environmental conditions.

Outcome 2

Set up flame spraying equipment.

Performance criteria

- 2.1 Equipment is prepared.
Range condition checked, set up, adjusted, made safe to use.
- 2.2 Equipment serviceability is checked.
- 2.3 Sequence of operations is planned and verified.

Outcome 3

Flame spray aeronautical components.

Performance criteria

- 3.1 Component is flame sprayed.
- 3.2 Component is measured and checked for conformity with specifications.
Range dimensional accuracy, profile, surface finish.
- 3.3 Any defects are reported, recorded, and rectified.
- 3.4 Unserviceable parts and materials are disposed of.
Range identification labelling, destruction and dispatch.

Outcome 4

Prepare aeronautical components.

Performance criteria

- 4.1 Components are prepared.
Range may include but is not limited to – use, storage, transit, surface protection, packing.
- 4.2 Documentation is completed.

Outcome 5

Carry out task completion activities.

Performance criteria

5.1 Completion activities specific to the task and work area are carried out.

Range may include but are not limited to – tool control, cleanliness, tidiness, return of publications, preparation for next activity, return of aircraft and systems to normal.

5.2 Leftover items, parts, and materials are disposed of.

Range may include but is not limited to – serviceable, unserviceable, surplus, waste, scrap, hazardous.

Planned review date	31 December 2024
----------------------------	------------------

Status information and last date for assessment for superseded versions

Process	Version	Date	Last Date for Assessment
Registration	1	19 June 1995	31 December 2016
Revision	2	7 August 1997	31 December 2016
Revision	3	8 May 2001	31 December 2016
Review	4	26 March 2007	31 December 2016
Review	5	24 October 2014	31 December 2021
Review	6	26 March 2020	N/A
