

<b>Title</b>	<b>Repair or overhaul helicopter belt-drive components</b>		
<b>Level</b>	<b>4</b>	<b>Credits</b>	<b>4</b>

<b>Purpose</b>	People credited with this unit standard are able to: prepare to repair or overhaul helicopter belt-drive components; locate non-conformities in helicopter belt-drive components; repair or overhaul helicopter belt-drive components; test and adjust helicopter belt-drive components; and complete finishing activities related to the repair or overhaul task of helicopter belt-drive components.
----------------	--

<b>Classification</b>	Aeronautical Engineering > Helicopter Repair and Overhaul
-----------------------	---

<b>Available grade</b>	Achieved
------------------------	----------

---

### Guidance Information

- 1 All tasks must be carried out in accordance with enterprise procedures.
- 2 Definition  
*Enterprise procedures* – procedures used by the organisation carrying out the work and applicable to the tasks being carried out. Examples are – standard operating procedures, safety procedures, equipment operating procedures, codes of practice, quality management practices and standards, procedures to comply with legislative and local body requirements.
- 3 Repair or overhaul activities are those usually carried out in a specialist bay or workshop.

---

### Outcomes and performance criteria

#### Outcome 1

Prepare to repair or overhaul helicopter belt-drive components.

#### Performance criteria

- 1.1 Task is determined by reviewing documentation.  
Range confirm fault, repair, overhaul, modify.
- 1.2 Component identity is confirmed with documentation.

1.3 Work area is prepared, and resources obtained and checked for serviceability or status.

Range may include but is not limited to – publications, materials, tools, equipment, safety equipment, environmental conditions established.

1.4 Component is prepared for repair or overhaul.

Range clean, inspect, assess economics of carrying out repair or overhaul.

1.5 Next task is determined and documented.

Range locate non-conformities, repair or overhaul, test, adjust, complete the task.

## **Outcome 2**

Locate non-conformities in helicopter belt-drive components.

### **Performance criteria**

2.1 Non-conformities are located using troubleshooting techniques and inspection procedures appropriate to the non-conformity indications.

2.2 Non-conformities found during troubleshooting are reported and documented.

## **Outcome 3**

Repair or overhaul helicopter belt-drive components.

### **Performance criteria**

3.1 Component is disassembled.

Range clean, label, preserve, segregate.

3.2 Non-conformities found during disassembly are reported and recorded.

3.3 Rectification action is determined and documented.

Range repair, overhaul, replace, modify, adjust, scrap; confirmation of action to be taken obtained from supervisor, action to be taken recorded.

3.4 Replacement parts are procured and verified as authentic and serviceable.

Range identify, inspect.

- 3.5 Non-conformities are rectified.  
Range repair, replace, modify, adjust.
- 3.6 Component is assembled.
- 3.7 Inspections are obtained.  
Range independent, duplicate, progressive.

#### **Outcome 4**

Test and adjust helicopter belt-drive components.

##### **Performance criteria**

- 4.1 Component is prepared for testing.
- 4.2 Component is tested and adjusted.  
Range troubleshoot, functionally test, calibrate, adjust, document adjustments and performance.
- 4.3 Inspections are obtained.  
Range independent, duplicate, progressive.

#### **Outcome 5**

Complete finishing activities related to the repair or overhaul task of helicopter belt-drive components.

##### **Performance criteria**

- 5.1 Component is prepared for use, storage, or transit.  
Range locking, inhibiting, blanking, packing.
- 5.2 Completion activities specific to the task and work area are carried out.  
Range may include but is not limited to – tool control, cleanliness, tidiness, return of publications, preparation for next activity, return of helicopter and systems to normal.
- 5.3 Resources are checked for serviceability and returned to service or storage.  
Range tools, equipment, safety equipment.
- 5.4 Leftover parts and materials are disposed of.  
Range may include but is not limited to – serviceable, unserviceable, surplus, waste, scrap, hazardous.

5.5 Documentation is completed.

<b>Planned review date</b>	31 December 2024
