

Title	Hand fettle and clean a textile carding machine		
Level	3	Credits	5

Purpose	People credited with this unit standard are able to: demonstrate knowledge of fettling; prepare card for hand fettling and carry out fettling process; and clean vegetable matter removal devices.
----------------	--

Classification	Textiles Manufacture > Core Yarn Processing
-----------------------	---

Available grade	Achieved
------------------------	----------

Guidance Information

- 1 Legislation relevant to this unit standard includes but is not limited to the Health and Safety at Work Act 2015.
- 2 Definition
Workplace procedures – procedures used by the organisation carrying out the work and applicable to the tasks being carried out. Examples are – standard operating procedures, site safety procedures, equipment operating procedures, codes of practice, quality management practices and standards, and procedures to comply with legislative and local body requirements.
- 3 Assessment guidance
 Competency is intended to be demonstrated on the type of carding machine installed in the candidate's workplace.
- 4 Assessment information
 All evidence must be in accordance with workplace procedures.

Outcomes and performance criteria

Outcome 1

Demonstrate knowledge of fettling.

Performance criteria

- 1.1 The process, factors and need for fettling are described.

Range	fettling technique, effect on carding performance, prevention of colour contamination, prevention of fibre contamination.
-------	---

Outcome 2

Prepare card for hand fettling and carry out fettling process.

Performance criteria

- 2.1 Machine is prepared for fettling.
Range rollers free to rotate, rollers removed when necessary.
- 2.2 Clothing and shoes worn are safe and prevent damage to the card wire.
- 2.3 Protective pads and boards are in place to prevent damage to wire.
- 2.4 Fettling tool suits the type of roller being fettled.
- 2.5 Card rollers are cleaned and fettled.
Range fibre removed, metallic wire degreased.
- 2.6 Card wire is checked for wear and damage, and reporting procedures are followed where wear or damage is detected.
- 2.7 Condition of roller belts, bearings, and chains meet manufacturer's requirements.
- 2.8 Fettlings are sorted and collected.
- 2.9 Undergrids and roller covers are clean and free of droppings.

Outcome 3

Clean vegetable matter removal devices.

Performance criteria

- 3.1 Cleaning is carried out to ensure device operates to specification.
- 3.2 Card wire is checked for wear and damage and reporting procedures followed where wear and/or damage is detected.

Replacement information	This unit standard and unit standard 4181 were replaced by unit standard 32920.
--------------------------------	---

This unit standard is expiring. Assessment against the standard must take place by the last date for assessment set out below.

Status information and last date for assessment for superseded versions

Process	Version	Date	Last Date for Assessment
