

Title	Reel yarn		
Level	2	Credits	3

Purpose	People credited with this unit standard are able to; demonstrate knowledge of reeling and the reeling machine; prepare and operate a reel; identify and fix operational and product faults; and clean reeling machine and work area
----------------	---

Classification	Textiles Manufacture > Core Yarn Processing
-----------------------	---

Available grade	Achieved
------------------------	----------

Guidance Information

- 1 Legislation relevant to this unit standard includes but is not limited to the Health and Safety at Work Act 2015.
- 2 Definition
Workplace procedures – procedures used by the organisation carrying out the work and applicable to the tasks being carried out. Examples are – standard operating procedures, site safety procedures, equipment operating procedures, codes of practice, quality management practices and standards, and procedures to comply with legislative and local body requirements.
- 3 Assessment guidance
Competency is intended to be demonstrated on the type of machine installed in the candidate's workplace.
- 4 Assessment information
All evidence must be in accordance with workplace procedures.
- 5 Reeling and reeling machine are referred to as hanking and hanking machine in some workplaces.

Outcomes and performance criteria

Outcome 1

Demonstrate knowledge of reeling and the reeling machine.

Performance criteria

1.1 The function and operation of the parts of the reel are described.

Range machine controls, creel, yarn guides, knock-off devices, swift, tension devices, traverse motion, hank removal mechanism, knotters.

Outcome 2

Prepare and operate a reel.

Performance criteria

2.1 Machine is operated.

2.2 Reeling machine is prepared for operation.

Range yarn identified, creel loaded, thread up, tension device, knock-off devices, yarn ties identified.

2.3 Test hank is produced.

2.4 Yarn is processed.

Range creel maintained, full hanks tied off and doffed.

2.5 Yarn joins are made.

Range knot, splice, twist at join maintained.

2.6 Production is handled and records are kept.

Outcome 3

Identify and fix operational and product faults.

Performance criteria

3.1 Corrective action is taken to rectify yarn faults identified during processing.

Range yarn breaks, thick and thin, yarn appearance, contamination, twist variation.

3.2 Reeling machine malfunction is identified and corrective action taken.

Outcome 4

Clean reeling machine and work area.

Performance criteria

- 4.1 Machine and work area are kept clear of fibre and waste to prevent contamination.
- 4.2 Reeling machine is cleaned.
- 4.3 Waste is collected and sorted for recycling.

This unit standard is expiring. Assessment against the standard must take place by the last date for assessment set out below.

Status information and last date for assessment for superseded versions

Process	Version	Date	Last Date for Assessment
