### Special notes

- 1 Definition  
*Proprietary partitions*, for the purpose of this unit standard, are non-load bearing; normally, but not limited to, steel stud framing and aluminium partitioning suites.
- 2 Credit for this unit standard can be achieved on site through a registered assessor, or off site in a simulated training environment with an accredited training provider.
- 3 Legislation relevant to this unit standard includes: Health and Safety in Employment Act 1992; Health and Safety in Employment Regulations 1995; Building Act 2004.

## Elements and performance criteria

### Element 1

Identify and describe the principles of interior proprietary partitions.

Range timber, processed timber, metal.

### Performance criteria

- 1.1 The description identifies principles of design of interior proprietary partitions and their components, as detailed by the proprietary partition manufacturer.
- 1.2 The description identifies principles of construction of interior proprietary partitions, as detailed by the proprietary partition manufacturer.

---

### Please note

Providers must be accredited by the Qualifications Authority, or an inter-institutional body with delegated authority for quality assurance, before they can report credits from assessment against unit standards or deliver courses of study leading to that assessment.

Industry Training Organisations must be accredited by the Qualifications Authority before they can register credits from assessment against unit standards.

Accredited providers and Industry Training Organisations assessing against unit standards must engage with the moderation system that applies to those standards.

Accreditation requirements and an outline of the moderation system that applies to this standard are outlined in the Accreditation and Moderation Action Plan (AMAP). The AMAP also includes useful information about special requirements for organisations wishing to develop education and training programmes, such as minimum qualifications for tutors and assessors, and special resource requirements.
