Demonstrate knowledge of and cast fibrous plaster ceiling panels and tiles in a factory

Level 3
Credits 5

Purpose People credited with this unit standard are able to describe methods used to cast, cure and store fibrous plaster ceiling panels and tiles in a factory; and cast fibrous plaster ceiling panels and tiles in a factory.

Subfield Construction Trades
Domain Fibrous Plaster
Status Registered
Status date 25 January 2008
Date version published 25 January 2008
Planned review date 31 December 2011
Entry information Open.
Accreditation Evaluation of documentation and visit by NZQA and industry.

Standard setting body (SSB) Building and Construction Industry Training Organisation

Accreditation and Moderation Action Plan (AMAP) reference 0048
This AMAP can be accessed at http://www.nzqa.govt.nz/framework/search/index.do.

Special notes
1 Definitions
Green panels and tiles means freshly cast panels and tiles of fibrous plaster that have yet to be dried.
Specifications refers to documented instructions (oral, written, graphic) and may include any of the following: manufacturer’s specifications, recommendations or technical data sheets; material specifications; specifications from a specialist source such as an architect, designer, engineer or a supervisor; site or work specific requirements.
2 Performance of the elements must meet work requirements of a commercial environment. Work requirements are detailed in the Industry Productivity Guidelines which are available from the Building and Construction Industry Training Organisation, PO Box 2615, Wellington.

4 Credit for this unit standard indicates compliance with industry practice. Industry practice refers to the ability to demonstrate knowledge and skills that reflect the productivity, uniformity, finish quality and material economies currently accepted within industry.

Elements and performance criteria

Element 1

Describe methods used to cast, cure and store fibrous plaster ceiling panels and tiles in a factory.

Performance criteria

1.1 Method of preparing moulds and casting is described in accordance with factory requirements.

   Range rigid moulds, flexible moulds, plain panels and tiles, acoustic panels and tiles.

1.2 Method of curing and storing green panels is described in accordance with factory requirements.

Element 2

Cast fibrous plaster ceiling panels and tiles in a factory.

Range rigid moulds, flexible moulds, plain panels and tiles, acoustic panels and tiles.

Performance criteria

2.1 Moulds are prepared in accordance with factory requirements.

2.2 Plaster is mixed, and panels and tiles are cast and reinforced in accordance with factory requirements and industry practice.

2.3 Green panels and tiles are dried and stored to factory requirements.

2.4 Insulation and protection are installed as required by job specifications.

2.5 All operations are completed, workplace, tools and moulds are cleaned, and tools and moulds are stored in accordance with factory requirements.
Please note

Providers must be accredited by NZQA, or an inter-institutional body with delegated authority for quality assurance, before they can report credits from assessment against unit standards or deliver courses of study leading to that assessment.

Industry Training Organisations must be accredited by NZQA before they can register credits from assessment against unit standards.

Accredited providers and Industry Training Organisations assessing against unit standards must engage with the moderation system that applies to those standards.

Accreditation requirements and an outline of the moderation system that applies to this standard are outlined in the Accreditation and Moderation Action Plan (AMAP). The AMAP also includes useful information about special requirements for organisations wishing to develop education and training programmes, such as minimum qualifications for tutors and assessors, and special resource requirements.
