Accreditation Evaluation of documentation by NZQA and industry.

Standard setting body (SSB) Infrastructure ITO

Accreditation and Moderation Action Plan (AMAP) reference 0101

This AMAP can be accessed at <http://www.nzqa.govt.nz/framework/search/index.do>.

Special notes

- 1 The following legislation and regulations must be complied with: Health and Safety in Employment Act 1992; Health and Safety in Employment Regulations 1995; and Resource Management Act 1991.
- 2 Assessment against this unit standard must take place in a workplace environment. Assessment parameters will be dependent on company and site specific equipment, procedures, and practices. Practices must reflect industry best practice and comply with legislative requirements.

- 3 Definitions
Company requirements include the policy, procedures, and methodologies of the company. They include legislative and regulatory requirements which may apply across the company or to a specific site. Requirements are documented in the company's health and safety plans, traffic management plans, contract work programmes, quality assurance programmes, policies, and procedural documents. *Contract specifications* include plans, diagrams, and special technical conditions. They do not include special administrative conditions.
- 4 Work on gas, telecommunications and power services should be carried out under supervision of the relevant service provider.

Elements and performance criteria

Element 1

Undertake maintenance of site.

Performance criteria

- 1.1 Gates, barricades, and fencing are maintained in accordance with contract specifications and company requirements.
- 1.2 Site grounds are maintained in accordance with contract specifications and company requirements.
- 1.3 Services are maintained in accordance with company and service provider requirements.

Range water, electricity, telephone, sewer and/or septic storage, stormwater.
- 1.4 Site buildings, accessories, and ablutions are maintained in accordance with company requirements.
- 1.5 Storage facilities are maintained in accordance with company requirements and Health and Safety in Employment Regulations 1995.

Element 2

Remove temporary buildings and works.

Performance criteria

- 2.1 Equipment and accessories are removed in accordance with company requirements.
- 2.2 Services are disconnected in accordance with service provider requirements.
- 2.3 Temporary constructions are dismantled and removed in accordance with company requirements.

- 2.4 Temporary drains and sumps are disconnected and filled in accordance with service provider requirements.

Element 3

Clean up site.

Performance criteria

- 3.1 Waste and unwanted materials are cleared and removed from site in accordance with contract specifications and company requirements.
- 3.2 Tools and equipment are cleaned, maintained, and transported away from site in accordance with company requirements.
- 3.3 Site area is restored to its specified condition in accordance with contract specifications and company requirements.

Please note

Providers must be accredited by the Qualifications Authority, or an inter-institutional body with delegated authority for quality assurance, before they can report credits from assessment against unit standards or deliver courses of study leading to that assessment.

Industry Training Organisations must be accredited by the Qualifications Authority before they can register credits from assessment against unit standards.

Accredited providers and Industry Training Organisations assessing against unit standards must engage with the moderation system that applies to those standards.

Accreditation requirements and an outline of the moderation system that applies to this standard are outlined in the Accreditation and Moderation Action Plan (AMAP). The AMAP also includes useful information about special requirements for organisations wishing to develop education and training programmes, such as minimum qualifications for tutors and assessors, and special resource requirements.
