-----------------------	--

Available grade	Achieved
------------------------	----------

Guidance Information

- 1 It is recommended that people hold credit for Unit 21668, *Demonstrate knowledge of cleaning automotive components* before being assessed against this unit standard.
- 2 Evidence presented for assessment against the performance criteria of this unit standard must be consistent with safe working practices and be in accordance with applicable manufacturer's specifications, service information, company requirements (this includes the knowledge and use of suitable tools and equipment).
- 3 Legislation, regulations and/or industry standards relevant to this unit standard include but are not limited to the current version of – Hazardous Substances and New Organisms Act 1996; Health and Safety at Work Act 2015, Resource Management Act 1991, Toxic Substances Regulations 1983; and any subsequent amendments and replacements.
- 4 **Definitions**
Company requirements refer to instructions to staff on policy and procedures which are documented in memo or manual format and are available in the workplace. These requirements include but are not limited to – company policies and procedures, work instructions, product quality specifications and legislative requirements.
Service information may include but is not limited to – technical information of a vehicle, machine, or product detailing operation; installation and servicing procedures; manufacturer instructions; technical terms and descriptions; and detailed illustrations. This may be accessed from the manufacturer.
Suitable tools and equipment means industry approved tools and equipment that are recognised within the industry as being the most suited to complete the task in a professional and competent manner with due regard to safe working practices.
- 5 As this unit standard covers many different work situations, the relevant industry Code of Practice relating to specific cleaning materials or substances, and the handling of specific materials, must be consulted and followed.

Outcomes and performance criteria

Outcome 1

Clean automotive components.

Performance criteria

- 1.1 A cleaning method is selected according to the type of component to be cleaned.
- 1.2 Equipment and machines are operated according to the manufacturer's instructions.
- 1.3 Automotive components are cleaned so that foreign matter is removed.
- 1.4 Waste is removed from the cleaning area in an environmentally safe manner.
