Guidance Information

Definitions

Marine industry refers to: design, building, and manufacturing of crafts such as yachts and boats. These may range from dinghies to ocean-going motor and sailing yachts (up to a length of 120 metres); marine oriented support activities such as mast and spar making, sail making, painting, electrical installation, engineering, product sales, boat sales and brokerage, storage and marinas, consulting services, the buying and selling of craft; maintenance and servicing of these craft (excluding power boat servicing).

Activities refer to undertakings relevant to marine or composite work sites such as the designing, building, manufacturing, refitting, or marketing boats or other items.

Refit refers to the servicing, refurbishing, repairing, and maintenance of craft.

Outcomes and performance criteria

Outcome 1

Describe marine and composite industry activities.

Performance criteria

1.2 Activities are described and related to the industry.

Outcome 2

Explain the geographic spread of marine industry activity in New Zealand.

Performance criteria

- 2.1 The geographic spread of marine industry sector activity is explained in terms of volume, type, resources, and demand.

Outcome 3

Explain the marine and composite industry's present and future markets.

Performance criteria

- 3.1 New Zealand's present and future markets are identified by volume and value.
- Range markets may include – trailer power boats, yachts and launches, superyachts, racing yachts, rigid hull inflatable boats (RHIBs), refit, commercial.
- 3.2 The markets are explained in terms of New Zealand potential for future growth.
- 3.3 Activities that promote the New Zealand marine and composite industries are explained in terms of the benefits to the New Zealand economy.

Outcome 4

Describe current issues which may affect activities and the future of the New Zealand marine and composite industry.

Range issues may include – economic, technology advances, changing regulations, quality assurance requirements, environmental sustainability.

Performance criteria

- 4.1 Issues are identified and described in terms of their impact on industry activities

This unit standard is expiring. Assessment against the standard must take place by the last date for assessment set out below.

Status information and last date for assessment for superseded versions

Process	Version	Date	Last Date for Assessment
Registration	1	7 May 1997	31 December 2015
Revision	2	21 March 2001	31 December 2015
Revision	3	16 April 2004	31 December 2015
